Research Workshop Evaluation

- What did you like about this Workshop?

I met people with interests similar to mine.

- What did you not like about this Workshop?

I did not meet people with interests complementary to mine.

- How could the Workshop be improved?

In the next Workshop, we could break out according to application focus.
For example,

Engine control

biomedical instrumentation, signal processing, and data management
automation

- Do you recommend other faculty to be invited and industrial members who might also benefit?

- Other comments?

Research Workshop Evaluation

- What did you like about this Workshop?

Meeting other researchers in the NE Ohio area. The ^{brief} presentations were interesting, and allowed us to understand the interests & strengths of other researchers.

- What did you not like about this Workshop?

Hopefully every meeting would not follow that same format, but allow discussion of specific ideas for collaboration and projects.

- How could the Workshop be improved?

To move to more specific collaborative projects. Would like to meet with other industry collaborators.

- Do you recommend other faculty to be invited and industrial members who might also benefit?

Yes - for example, my colleague Andy Padgugski. Also technical people from Rockwell and ABB.

- Other comments?

Find ways to match problems away of ITC industry with research capabilities of local ITC researchers.

Lee White

Research Workshop Evaluation

- What did you like about this Workshop?

- Meeting ^{NEW} industry people
- Meeting fellow researchers

- What did you not like about this Workshop?

- Lack of specific outputs or concrete results
- Session included too many people

- How could the Workshop be improved?

- Future plans
- Longer duration of meetings
- More Focused groups
- Industry presentations - what problems they have

- Do you recommend other faculty to be invited and industrial members who might also benefit?

- Other comments?

(Thank you for your feedback)

Research Workshop Evaluation

- What did you like about this Workshop?

- What did you not like about this Workshop?

- How could the Workshop be improved?

• Have focus groups — e.g. —

① Intelligent Manufacturing Systems

② Intelligent Networks —

- Do you recommend other faculty to be invited and industrial members who might also benefit?

You can contact me —

Behnam (Ben) Malakooti

Prof. IECS,

bxm4 @ case . edu —

- Other comments?

I can help to reorganize
and lead above two areas —
Thanks.

Research Workshop Evaluation

- What did you like about this Workshop?

I liked the introduction to the work done by all other people who attended. The opportunity to meet other researchers in the area.

- What did you not like about this Workshop?

I thought the group was a little large - but that cannot be helped for the first meeting. So for the next ones, if we could make the group smaller, we can make more progress.

- How could the Workshop be improved?

Focus groups - more detailed discussions
position papers.

- Do you recommend other faculty to be invited and industrial members who might also benefit?

- Other comments?
