*"Rooster hits the washboard and people just got to smile
Blinky thumps the gut bass and solos for a while."*

Research Description

- Wide variety of internetworking issues:
 - ▶ protocols
 - ▶ architectures
 - ▶ technologies
- Broadly, our goals are to increase:
 - ▶ robustness
 - ▶ security
 - ▶ performance
- Work in the research and standards arenas

Previous and Current Projects

- congestion control
- network measurement
 - ▶ wide-area and enterprise
 - ▶ sharing networking measurements
- satellite/wireless networking
- tracking botnets
- behavioral host database for security
- network troubleshooting
- active queue management
- ...

Interaction

- Goals: wide dissemination of high quality results (and, paying the bills!)
- Very much in favor of local interaction
 - ▶ always looking for energetic research collaborators
 - ▶ leverage a variety of skill sets
- Obstacles:
 - ▶ we barely *know* each other
 - ▶ geography
 - ▶ ultimately, no *good reason*
 - but, *effort* is required
